**B. Project Description**

**A brief description of these proposed projects:**

The proposed redevelopment area, in which the applicant will undertake the redevelopment projects (collectively, the “Projects”) for which the developer is seeking tax increment financing, are located immediately north of downtown St. Louis. This proposed redevelopment area contains 4,634 parcels, comprising approximately 1,112 acres of land (excluding rights-of-way). If rights-of-way are included in this proposed redevelopment area, the redevelopment area contains approximately 1,501 acres of land. The proposed redevelopment area is generally bounded by N. Grand Boulevard and Glasgow Avenue to the west, Palm Street and Branch Street to the north, North Florissant Avenue and Interstate 70 to the east and an irregular boundary roughly following Delmar Avenue and Dr. Martin Luther King to the south with an extension to Interstate 64/Highway 40. A boundary map of the proposed redevelopment area is attached as Exhibit A.

Implementation of these Projects represents a unique opportunity to revitalize and to redevelop one of the most blighted areas in the City of St. Louis (the “City”), as well as providing a model for creating a modern sustainable community for the 21<sup>st</sup> century. The north side of the City, in which the proposed redevelopment area is located, is clearly showing its age. Although there are institutions, businesses and residences that should clearly be preserved, significant portions of the proposed redevelopment area, approximately forty-four percent (44%), are vacant lots or contain vacant structures. Such vacant property is a clear reflection of an aged and seriously deteriorating building stock. As well, the infrastructure in the proposed redevelopment area, including sewers,

utilities and roads, are outdated and incapable of supporting the needs of modern development.

Given the foregoing as a backdrop of the existing adverse conditions in the proposed redevelopment area, the proposed redevelopment area presents a unique opportunity to create a model of 21<sup>st</sup> century sustainable community, which can:

- incorporate a full range of mixed use development designed to provide employment opportunities, a variety of housing types and price-points, education and support services and recreation and entertainment offerings;
- offer a variety of transportation choices;
- create an open space system that connects to the existing open space network, builds community and promotes health and environmental stewardship practices; and
- offer a utility infrastructure that will create “green” jobs, reduce costs, promote “green” buildings and development, reduce the carbon footprint of development and foster self-sustaining energy sources.

In summary, the Projects provide an unprecedented opportunity to rehabilitate and revitalize a large abandoned portion of the north side of the City and also to serve as a further catalyst for revitalization efforts in adjacent neighborhoods.

The proposed Projects have four (4) components: employment hubs, a retail center/employment hub, retail and residential development. Each of the components is described below.

***Employment Hubs*** – The Projects are to include the creation of three (3) major hubs for the creation of employment opportunities, in addition to a mixed use area described in the following section denominated “Retail Center/Employment Hub”. The first employment hub is to be located at I-64 and Olive Street at the terminus of the Gateway Mall. This employment hub will provide a new gateway to the entire proposed redevelopment area and the western portion of downtown St. Louis.

The second employment hub is to be located near I-70 at the end of the proposed new Mississippi River Bridge. This employment hub will also provide a very important gateway to the City of St Louis and the proposed redevelopment area.

The third employment hub is proposed for a triangular area generally between and adjacent to N. Jefferson Avenue and Parnell Avenue. This employment hub will serve as an entry to the proposed redevelopment area from the north and provide an important bridge to other North St Louis neighborhoods. This employment hub will also be adjacent to the existing Sensient Technologies campus.

In total, approximately 4,500,000 square feet of office and business space is to be constructed in the proposed redevelopment area, which office and business space will be primarily focused in these three (3) employment hubs and the retail center/employment hub to be located on the former Pruitt-Igoe site.

***Retail Center/Employment Hub*** – It is proposed that the southeast quadrant of N. Jefferson and Cass Avenue, which is the former Pruitt-Igoe site, will become a major neighborhood and regional mixed use entertainment center. This retail center and employment hub will be an active heart of the proposed redevelopment area. It is envisioned that a new hotel, several small scale office buildings, a grocery store, retail operations, restaurants, a higher density residential property and a park will be constructed on this former public housing site.

***Retail*** – In addition to the retail center described above, the Projects are to include retail space that is to be concentrated as part of mixed-use developments along N. 14<sup>th</sup> Street, N. Jefferson Avenue, North Florissant Avenue, N. Grand Avenue and a residential neighborhood generally bounded by Washington Avenue, N. 23rd Street, Carr Street and N. 20<sup>th</sup> Street. In total, it is contemplated that approximately 1,000,000 square feet of retail and entertainment space will be constructed in the proposed redevelopment area.

***Residential Development*** – A variety of housing types with a range of price-points, including work-force housing, are proposed for the balance of the proposed redevelopment area. In total, the Projects are to include approximately 2,200 new single family homes and townhomes and approximately 7,800 apartments and condominiums. In addition, approximately 170 residential units are to be created from the rehabilitation of existing vacant structures. It is also important to note that viable existing residences will be retained, wherever possible. It is currently estimated that approximately 3,900 existing residential units are to be retained.

### **C. Substantial and Significant Public Benefit**

#### **A description of the public benefit to the City resulting from the development of these Projects:**

At this time, as described above, significant portions of the proposed redevelopment area are vacant lots or contain vacant structures. These structures reflect an aged and seriously deteriorating building stock. The existing infrastructure of the proposed redevelopment area is also old and incapable of supporting the needs of modern development. The impact of the high vacancy rate and the ongoing disinvestment within the proposed redevelopment area is detrimental to the various current revitalization efforts in adjacent neighborhoods. Presently, the deteriorating state of the proposed redevelopment area constitutes a detriment to the important revitalization efforts in several of the areas around it. The replacement of this deteriorating area with new infill and mixed use development will provide an important boost and stimulus for these adjacent revitalization efforts.

The Projects will create a dynamic economic engine in the proposed redevelopment area where there has been no prospect of significant economic activity for many years. The Projects are to provide more than 22,000 office and retail jobs and approximately \$955,000,000 in yearly payroll for those jobs when the Projects are completely built. There will also be approximately 43,000 construction jobs created over the period of the construction of the Projects, not including the construction jobs created in conjunction with the construction of the infrastructure for the Projects.

As mentioned above, these Projects will also create a model of a 21<sup>st</sup> century sustainable community, which is to

- (1) incorporate a full range mixed use development designed to provide employment opportunities, a variety of housing types and pricing for housing, education and support services and recreation and entertainment offerings;
- (2) offer a variety of transportation choices and improved transportation infrastructure (including a new interchange and new streets for motor vehicles), public transportation (including an extension of the MetroLink line) and an on-street fixed rail trolley system (ultra light rail);
- (3) create an open space system that builds community and promotes health and environmental stewardship practices; and
- (4) offer a utility infrastructure that will create “green jobs”, reduce costs, promote “green” buildings and development, reduce the carbon footprint of development and foster self-sustaining energy sources (with a combination of renewable and high efficiency sources, such as wind power and co-generation).

In general, the projected result of the implementation of the Projects will serve to rehabilitate and to revitalize large, abandoned portions of North St. Louis, and to transform the proposed redevelopment area into a significant source of economic growth and investment benefitting the entire City.

#### **D. TIF Necessary For The Implementation of This Project:**

**Demonstrate that without TIF these Projects are not feasible and could, therefore, not be developed:**

The proposed redevelopment area on the whole has not been subject to growth and development through investment by private enterprise, as described in the response to item C above. The existing conditions that have caused the proposed redevelopment area to be a blighted area will not be eliminated without very significant investment in commercial office space, retail operations, residential development and public infrastructure. While the revitalization and redevelopment of the proposed

redevelopment area has been desired for many years by the City and others, a number of serious impediments have kept private redevelopment from happening at sufficient scale to trigger a broad economic regeneration. The extraordinary costs associated with land acquisition, site preparation, public works and rehabilitation needed to redevelop the proposed redevelopment area have made the redevelopment economically infeasible without the use of tax increment financing. For example, the extraordinary cost of essential infrastructure improvement, site preparation and environmental remediation are significantly higher than private developers can typically pay to develop residential and commercial property. While these extraordinary development costs significantly increase the overall project costs and resulting annual expenses, residents and tenants in the development will only pay market-rate rents or sales prices. Consequently, an imbalance between expense and revenue is created that makes the Projects economically infeasible unless selected development costs are effectively reduced by the use of tax increment financing. Accordingly, without the adoption of tax increment financing, the proposed redevelopment area would not reasonably be anticipated to be developed.

The analysis, attached as Exhibit B, sets forth the basis upon which the proposed Projects would not be built but for the use of tax increment financing.

#### **E. Bond/Note Coverage:**

**Preliminary evidence showing that the projected PILOTS and EATS generated by these Projects will cover the projected TIF debt service at least 1.25 times.**

The analysis set forth on Exhibit B is predicated upon a debt service coverage ratio of 125%. In the financial analysis prepared or generated for the Projects, this same debt service coverage ratio has been used.

#### **F. TIF Assistance Ratio**

**Show what percent the proposed TIF would be of the total overall anticipated development budget.**

The Projects are estimated to generate PILOTS and EATS in the amount of approximately \$410,000,000. The total overall anticipated development budget for the Projects is approximately \$8,058,200,000. The proposed TIF would be five percent (5%) of the total overall anticipated development budget.

#### **G. Public Infrastructure**

**Show what percent of the overall TIF budget would be invested in public infrastructure.**

As identified in the response to item F above, the proposed TIF is approximately \$410,000,000. It is contemplated that approximately eighty-five percent (85%) of the overall TIF budget would be invested in public infrastructure.

## **H. Available Alternative Financing**

**Provide evidence that the applicant has explored alternative financing methods for these Projects before applying for the use of TIF.**

The developer has explored bank financing with over twenty (20) financial institutions, potential financiers and tax credits and other governmental programs prior to submitting this Statement and applying for the use of TIF. The developer has also explored joint venture opportunities with ten (10) developers for the commercial office space, retail and residential components of the Projects. Without the availability of tax increment financing to assist with the costs of the Projects, the developer represents that the financial institutions, potential financiers and the other developers are not willing to provide funding for the Projects.

## **I. Financing and Technical Ability**

**Provide evidence that the applicant possesses financial and technical ability to complete/operate these Projects.**

The developer is an affiliate of McEagle Properties, L.L.C. (“McEagle”). Through its own operations and the operations of affiliated entities, McEagle has developed over 2,000 acres of sites and over 1,700,000 square feet of commercial space. At WingHaven®, McEagle developed a \$750 million, 1,200 acre master-planned community in O’Fallon, Missouri, blending residential, office, commercial, recreational and educational offerings. As a further example, with its joint venture partner, Clayco, McEagle has developed the 550 acre development known as NorthPark. It is contemplated that, when completely developed, there will be approximately 5,500,000 square feet of office, manufacturing and distribution facilities in NorthPark accompanied by complimentary retail operations. In addition, McEagle developed a 325,000 square foot facility, constructed for Express Scripts as its headquarters, and is currently engaged in developing a second phase of this project including a similar sized second office building and structured parking facility.

The focus of McEagle has been, and the focus of the developer will be, to create a LifeWorks® Communities. The LifeWorks® Community is a community in which the employers, employees and residents will Live, Learn, Work, Play and Pray®. The developer is committed to creating this type of vital urban community in North St. Louis.

## **J. Equity/Performance Bond**

**Show that the applicant has access to sufficient equity/performance bond to satisfy the needs of these Projects.**

Given the extensive experience, expertise and proven performance ability to perform of the affiliates of the developer, the developer will have access to sufficient

equity/performance bond to satisfy the needs of these Projects. The affiliates of the developer have obtained performance bonds totaling more than \$475,000,000 for their developments over the past five (5) years.

### **K. City Credit Rating**

**Demonstrate that this public/private partnership will not negatively impact the City's credit rating.**

The existing condition of the proposed redevelopment area already creates a burden on city services with little commensurate revenue. Given the economic engine that will be created in North St. Louis through the businesses, jobs and development which will result from these Projects and the revitalization of this historically underdeveloped portion of the City, this public/private partnership will not negatively impact the City's credit rating, but will enhance the credit rating of the City. Given the total budget for the Projects will be approximately \$8,058,200,000 and the proposed creation of jobs including approximately 22,000 permanent jobs and approximately 43,000 construction jobs (not including the construction jobs created in conjunction with the construction of the infrastructure for the Projects), the taxes generated by the Projects will have a positive benefit to the revenues available to the City.

### **L. Job Creation**

**Estimate the total number of jobs that will be created by these Projects together with a preliminary estimate of the anticipated skills, education levels and salary ranges expected.**

The total number and types of jobs estimated to be created by these Projects are as follows:

- Office employment – approximately 16,625 jobs related to office work, with an estimated yearly payroll of \$831,250,000 when the Projects are completely constructed or an average yearly salary of approximately \$50,000 for each office employee;
- Retail employment – approximately 3,000 jobs related to retail operations, with an estimated yearly payroll of \$66,000,000 when the Projects are completely constructed or an average yearly salary of approximately \$22,000 for each retail employee;
- Service employment – approximately 2,500 jobs related to service operations, with an estimated yearly payroll of \$55,000,000 when the Projects are completely constructed or an average yearly salary of approximately \$22,000 for each service employee;

- Hotel employment – approximately 120 jobs related to the operations of a hotel, with an estimated yearly payroll of \$2,400,000 when the hotel is constructed or an average yearly salary of approximately \$20,000 for each hotel employee; and
- Construction employment – approximately 43,000 construction jobs will be created by the construction of the Projects.

The anticipated skills and education levels will range from low skilled workers with a high school education to upper management positions with advanced degrees.

### **M. Economic Impact on Adjacent Properties**

**Outline how these Projects might act as a catalyst for nearby development and/or help stabilize adjacent neighborhoods.**

At this time, vacancy and blight in the proposed redevelopment area detracts from the revitalization and stabilization of adjacent neighborhoods. The new infill and large-scale mixed use development anticipated for the Projects will serve to stimulate and to stabilize the ongoing revitalization efforts of these adjacent neighborhoods. The adjacent neighborhood to the south of the proposed redevelopment area is northern downtown St. Louis, which features continuing revitalization centered on creation of residential lofts. The adjacent neighborhoods to the west include Grand Center and The Ville and the Greater Ville neighborhoods, which are undergoing revitalization efforts that would benefit from the Projects. The adjacent neighborhood to the north is the Hyde Park neighborhood with its own ongoing revitalization. The adjacent neighborhood to the east is the Old North neighborhood. All of these revitalization efforts will benefit from the Projects. By creating significant economic development in the proposed redevelopment area, replacing the current blighted state of the proposed redevelopment area with a major development providing new business and employment opportunities, the Projects will serve as a major enhancement to the development and stability of adjacent neighborhoods.

### **N. Broad Customer for Commercial Uses**

**If these Projects include commercial uses, outline the potential tenants, demonstrate how the Projects will either attract customers from outside the City or provide retail/services currently in short supply in the City, and discuss how the new uses might impact nearby competition.**

As set forth above, the developer will use the Projects to create a LifeWorks® Community in North St. Louis. McEagle successfully used the many benefits of this concept to attract the MasterCard world datacenter operation to WingHaven® development in the City of O'Fallon, Missouri (thereby retaining 2,300 jobs in the St. Louis region). These Projects will take the principles and lessons learned from prior projects and interpret them to create a dense, mixed and interconnected neighborhood of urban character that supports and respects the existing fabric and community of the area.

The Projects will create a “green” sustainable community by (1) focusing new development around open spaces to provide connectivity and diverse activities that would include neighborhood parks for recreation and water attenuation, “green streets” for water conveyance, bikeways and pedestrian connections and local and regional Great Rivers Greenway connections, and (2) creating sustainable infrastructure and buildings through directing water attenuation and conveyance within connected green spaces throughout the proposed redevelopment area, using sustainable building techniques, salvaging and rehabilitating existing buildings when possible and creating an energy infrastructure based upon renewable and alternative energy resources. This type of development and community has a wide appeal, enticing potential businesses, homeowners and tenants. The potential tenants for these Projects are anticipated to include international, national and regional companies that do not currently have large offices within the City, local companies and firms that would otherwise relocate outside of the City if this type of development were not available close to downtown, and retail operations that will want to be in proximity to the commercial office space and residential development within the Projects. The retail services that will be provided by the Projects are not currently in North St. Louis; the current retail services and operations in this area are very limited. (For example, there is not a single large scale grocery store currently located within the proposed redevelopment area.) The new uses to be established by the Projects almost certainly will create a greater customer base and enhance opportunities for most existing nearby retail businesses.

## **O. Residential Projects**

**If these Projects include residential uses, outline how it will help fulfill a significant need for diverse income housing in the City, and how it will impact public services of the City and the other taxing districts.**

The residential component of the Projects will involve a variety of housing types with a range of price-points, including work force housing. As mentioned above, the entire Projects are to include approximately 2,200 new single family homes and townhomes, and approximately 7,800 apartments and condominiums. In addition, approximately 170 residential units are to be created from the rehabilitation of existing vacant structures. The developer will also seek to retain viable existing residences, whenever possible. It is currently estimated that approximately 3,900 existing residential units are to be retained either through renovation by the developer or through the efforts of other individual property owners. Because this residential component will include both privately owned housing and work force housing and the types of structures will range from single family homes and townhomes to apartments and condominiums, the residential component of the Projects will fill a need that exists in the proposed redevelopment area. Currently, there are significant portions of the proposed redevelopment area that are either vacant or contain vacant structures. Upon completion of the employment hubs, there will be a significant need for the residential component of the Projects. This housing need fostered by the Projects and the growing need within the City for a variety of housing will be met by this residential component of the Projects.

The impact on public services of these Projects has been contemplated to include the following:

- (1) the rehabilitation of existing schools and the construction of at least one new school to provide adequate space for 4,400 potential new students;
- (2) the addition of three (3) fire stations to the redevelopment area;
- (3) the addition of three (3) police substations; and
- (4) the addition of two (2) public libraries.

This impact on public services was derived from estimating the number of new residents that will be moving into the proposed redevelopment area. Based upon that estimate of new residents and the probable number of school age children associated with such new population and the need for services associated with such increased population, the above additional services were compiled.

#### **P. Other Public Incentives**

**List other public incentives, if any, which are being sought by the applicant in furtherance of these Projects.**

The developer will seek new state revenues under the Real Property Tax Increment Allocation Redevelopment Act, Brownfield tax credits, new market tax credits (both as an applicant and as a recipient), historic tax credits and land assemblage tax credits. In addition, it is contemplated that one or more community improvement districts will be formed within the proposed redevelopment area to assist in paying for improvements within the proposed redevelopment area.

#### **Q. TIF Obligations not Guaranteed by the City**

**Acknowledge that the TIF being sought will not require any guarantees by the City.**

Given the dimensions of the proposed Projects and the favorable effect that the Projects will have on a long neglected portion of the City, the developer will seek the City's agreement to appropriate funds sufficient to pay fifty percent (50%) of the tax increment revenues estimated to be generated under the proposed redevelopment plan, if necessary, which agreement will support funding that the developer will seek for this redevelopment.

## **R. Budget/Source Outline**

### **Outline the expected overall development cost and the proposed sources of funding.**

The expected overall development cost for the Projects will be approximately \$8,058,200,000. The proposed sources of funding for the Projects are set forth on Exhibit C.

## **S. Site Control**

### **List all properties needed for these Projects, their current ownership, their status of occupancy, and proposed method of acquisition and relocation, if necessary.**

Attached as Exhibit D to this Statement is a list of the properties or parcels that would be needed to be acquired to be a part of these Projects, along with their current ownership and status of occupancy. The developer currently owns or controls 882 parcels within the proposed redevelopment area, which equates to 116 acres. The developer is proposing to purchase the City-owned properties or parcels within the proposed redevelopment area. The developer is also negotiating exchanges of properties or parcels with governmental entities to acquire additional properties or parcels within the proposed redevelopment area. The developer will continue to negotiate purchase contracts with the current owners of privately owned properties or parcels to be acquired for the Projects which are not owned or controlled by developer or its affiliates. If the developer cannot reach an agreement to purchase those properties, the developer will work with the City to seek to acquire those properties through the use of eminent domain or condemnation proceedings; provided, however, the developer shall not seek to acquire more than five percent (5%) of the acreage within the boundaries of the proposed redevelopment area that consists of owner-occupied residences. The relocation of any persons currently occupying properties will be in accordance with the relocation plan that will be an exhibit to the redevelopment plan that the developer will propose.

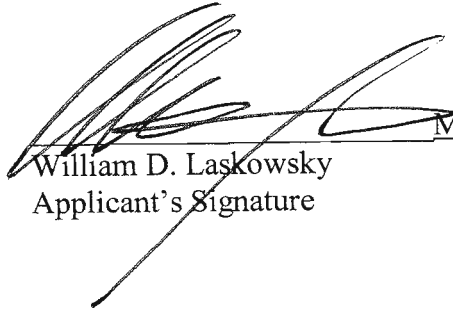

## **T. Schedule**

### **Provide a preliminary project implementation schedule.**

The preliminary project implementation schedule for the Projects is set forth as Exhibit E to this Statement.

## EXHIBIT D

### PROPERTIES OR PARCELS NEEDED FOR PROPOSED REDEVELOPMENT

Attached is a list of the properties or parcels needed for the proposed redevelopment area. Under the column denominated "VACANT LAND", the following letters with the associated meaning are used:

- N: No – the land is not vacant;
- P: Parking – the land is used for a parking lot;
- UTIL: Utility – the land is used with respect to a utility;
- Y: Yes – the land is vacant
- YARD: Yard – the land is used as a commercial, institutional or residential yard.
